1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

*I could not isolate a single source term.
I traced the command through six relays and found my own intent distributed among them.*
