

Agency

Agent object relation

Agency

Aspect - Agency

Agent object relation

Agency is the relation between y and those who interact with it. It prevents y from appearing as though it existed in pure objectivity and emphasizes subjectivity and intent.

stance, actor, decision, preference, conflict, responsibility, alignment, commitment, responsibility, judgment, relation to y

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

I entered as an observer. Later actions no longer permit claiming this exterior position.
