Aspect - Configuration

Internal organization

Configuration is the organization of y 's internal form. How parts are built, connected, divided, constrained. It moves thought from presence to how entities cohere.

configuration, architecture, internal organization, arrangement, order, structure, relation, partition, law, multiplicity, complexity, randomness

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

Diagram key: Parts first. Whole later.
