Aspect - Framing

Context

Context is the surrounding field within which y acquires constraint, influence, and meaning. It prevents isolation from masquerading as understanding.

context, surroundings, environment, conditions, embeddings, neighborhood, connections, other actors, influence, propagation

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

The thing made sense for us only within the the forest around it.
