Decision

Decision is the collapse of possibility into commitment. It marks where thought ceases to remain open and becomes intervention with cost and irreversibility.

objective, consequence, choice, selection, voluntary, burdens, goals, irreversibility, asymmetry, commitment, lock-in, control, intervention

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

I terminated exploration to reduce search cost and active branches. The site remembered them and disagreed.
