Error

Error is a wrongness that made it into execution, hindering functioning or understanding of y . It diagnoses if and where errors have been committed to.

error, wrongness, mistake, conceit, misunderstanding, mismatch, fallacy, confusion, mis-specification, discrepancy

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

*Reference line misread at installation. Execution perfect.
Task failed repeatedly.*
