Aspect - Difficulty

Fragility

Fragility is disproportionate sensitivity to disturbance or error and the amplification of problems. Reliability depends on conditions remaining strictly favorable.

fragility, sensitivity, brittleness, chaos, perturbation, error propagation, instability, collapse

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

Bridge held all season. Collapsed during inspection.
