Importance

Importance is relevance measured according to an arbitrary scale. It exposes how things are ranked, weighted or compared relative to each other.

importance, weighting, attention, selection, relevance, ranking, significance, value, meaning, reference, priority

- ▶ 1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

We copied one of the sentences in red. Empires later depended on it.
