Law

Law is order that persists across cases. Its elevates patterns from isolated occurrence to law. It asserts what remains bindingly true based on first principles.

law, symmetry, invariance, principle, cause, explanation, equation, inequality, logics, conservation, order, definition

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

Invariant entry: Whether by decree or equation, the curves are ellipsoidal the same way.
