Aspect - Difficulty

Limit

Beyond the limit, continuation is impossible.
Distinguishes what is not working currently from what is truly impossible under the constraints to which y adheres.

limit, constraints, impossibility, conditions, boundedness, boundaries, finiteness, feasibility, resources, capacity, saturation, stopping, non-convergence

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

*Beyond the sixth marker, return is no longer guaranteed.
Water sufficient for seven days. Air for one.*
