Passage

Aspect - Passage

Flow through system

Passage is y changing, through a process or forming one itself. y is not a fixed object but an entity with a history, present, and future beyond its current instance.

passage, input, output, transfer, transformation, recursion, process, movement, temporal development, transmission

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

Labyrinth entered in one form. Exited in another.
