Aspect - Passage

Recursion

Recursion is the return of what came before into what comes now. It warns against simplifying time and cause and emphasizes self-impact, making y act on y .

recursion, repetition, cyclicity, recurrence, sequentiality, evolution, history, past, memory, hysteresis, before/after

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

The labyrinth curves in on itself again.
