The Aspect

Aspect -

Thinking operators

A domain of reusable thought-operations. These cards do not describe y itself, but the moves by which y is analyzed.

aspects, general reasoning, abstraction pattern, framing, structure, change, limits, agency, analytic operators, algebra of thought, analysis

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

The thing is not what it seems to be. It seems to be what it is instead.
