Aspect - Passage

Transformation

Transformation is change that preserves identity. y may alter state, form, or properties without ceeding to be y . Distinguishes change from rupture.

transformation, phase transition, transition, continuous change, drift, deformation, functions, operators, reformulation

1. Choose a keyword x on this card.
2. Choose a target y , attach this card if possible.
 y may be any card, domain, object, or topic.
3. Interpret $x(y)$: Think of aspect x of target y .
If y is attached to target z , interpret $x(y(z))$.

Aspect cards modify what aspect of a target y is investigated.

Continuity note verifies object identity. Rupture not authorized in this sequence.
