Features

Stage Setup

Chameleon - Composition

Features

Features represent properties and are assigned a number. This number represents the strength of this property and supports meaningful interpretation of purely mathematical operations.

feature representation, abstraction, compression, interpretability, properties, handcrafted vs. learned

- ▲ Features correspond to meaningful, interpretable quantities.
- ▼ The tangle of numbers is misinterpreted as deep structure in an unordered setup.
- ▶ For target card, summarize its role with one keyword and one number.

"Which features do I feel need to be in the model?"

The stage setup reduced an epic journey to a handful of trenches and trees. Depending on the director, this setup created clarity or produced a muddle every actor stumbled over.
