Randomness

Chance represents randomness as an element of the world, not as error or ignorance. Some influences are inherently unpredictable, either due to deep complexity or absence of governing structure.

randomness, stochasticity, probability, unpredictability, reproducibility, irreducible uncertainty, indeterminacy

- ▲ Encourages thinking in terms of possibilities and probabilities.
- ▼ Excellent excuse for lack of understanding.
- ▶ Swap out target card for a randomly chosen different one.

"Which aspects of your phenomenon cannot be predicted even with complete context?"

An object comes to rest among stones and leaves. It belongs just as much as they do. Its faces are marked. No one was present for its arrival.
