Emergence

The appearance of structure where none was previously present. Not optimization nor improvement. An entity establishing itself, matter organizing, order rising from absence. Something taking shape.

pre-Initialization, differentiation, nucleation, formation, emergence, appearance, first-of-its-kind

Ability to think of qualitatively new behavior.

Introducing new entities liberally leads to confusion.

Inject a completely new idea into target card.

"What idea of yours is slowly forming without yet being stable?"

There was no life. Then there was. Nothing else changed yet.
