Propagation effects

Continuation through transmission. Matter and order moves, contacts its neighbors, and reproduces its influence outward. Effects spread laterally, and deeply. Transmission is an existence.

propagation, transmission, recurrence, cyclicity, waves, adjacency, neighborhood relations

▲ Influence and persistence without intention or memory.

▼ An unsolvable web of spatiotemporally dependent entities.

▶ Target card affects its neighbors.

"What would stop immediately if transmission were interrupted?"

Marchantia spreads. Nothing stops it. What lies nearby is affected next. The world is still unprepared.
