History as condition

Prior events do not vanish, they persist as condition rather than sequence. Energy has been spent. Structure has been bent. Constraints have been set. The system continues from where it has been left.

memory, initial conditions, hysteresis, state dependence, path dependence, legacy effects, irreversibility

Acknowledges initial conditions, path dependence.

Understanding never starts because the start is not understood.

Ask what was there before target card existed.

*"Are there any irreversible changes that predate the current phenomenon?"*

*It proceeds from what remains. It continues without recollection or reflection. A thousand years of alterations – and then it starts.*
