The correlated

Source - Trace

Stochastic process

Observations that are not independent in space, time or some other sense of neighborhood. The evidence appears partially unpredictable but structure persists through adjacency, memory, or shared cause.

structured randomness, spatiotemporal dependence, conditioning, auto/cross-correlation, random field

- ▲ Respects dependency flexibly without assuming a fixed functional model.
- ▼ Important relations and conditions relaxed to mere correlation.
- ▶ Place between two target cards, treat their impact as correlated.

"Which things are apparently correlated without me knowing why?"

Marks uneven. Still, gathered in bands. What appears at C1-6 reappears at C2-6. Site vaguely agreeing with itself.
