Incomplete data

What remains after the phenomenon has passed and left its marks is indirect, incomplete, imperfect. Important aspects have not been recorded, or are corrupted. Data is as flawed as everything else.

partial/incomplete/corrupted observation, missing samples/data, sample support, sampling bias

Awareness and optimal use of incomplete data.

Faulty data passes as complete truth unquestioned.

Treat target card as an incomplete record.

"What might have happened without leaving any trace at all?"

Shallow impressions cross the site's surface. Some fade midway. Others stop abruptly. No tracks lead in or out. Conclusion deferred.
