Relations

Shift attention from units to relations. Edges and bonds take the center stage. Nothing acts alone. Structure emerges from relation rather than substance.

relations, interactions, dependencies, transmission, propagation, graph edges, differential equations

Highlights laws /interactions governing elementary building blocks.

Lost in ungeneralizable local complexity and contradiction.

Use this card to connect two target cards into a construct of 3 cards, to be interpreted jointly.

"How much of what I see here is not what things are but how they are connected?"

$H - H$

Remove the atoms if you like. The lines already determine what can happen. Identity is secondary at this scale.
