Descriptive Plurality

The same phenomenon through different modes of observation. Different instruments, disciplines, and observers produce different descriptions, all partial and all valuable.

observer dependence, measurement modality, epistemic framing, perspectives of different disciplines

- ▲ Encourages epistemic humility and plural description.
- ▼ Fragments understanding if views are not reconciled.
- ▶ Interpret the target card using an unfamiliar discipline.

"How does the phenomenon look like from the perspective of an unfamiliar discipline?"

→ $I(\lambda)$, $w(x)$

Same event. Spectral lines or wet fingers, depending on your preference. This does neither contradict nor exhaust.
