Source - Viewpoints

Single Instance

The phenomenon as it happens in one exemplary instance. A single realization unfolds under specific conditions; it follows one chain, one occurrence, one outcome. This view does not generalize.

realization from distribution, sample from generative process, exemplary behavior, start-to-finish

- ▲ Trace one instance from start to finish; diagnose own knowledge.
- ▼ Encourages overgeneralization from one case.
- ▶ Think target card from start to finish in one specific instance.

"What does one instance of the phenomenon traced from start to finish actually look like?"

$2\text{H}_2 + \text{O}_2 \rightarrow 2\text{H}_2\text{O} + \Delta E$ Three molecules collide. Energy transfers. Bonds rearrange. It happens once.
