

The Structure

Model structure

The Structure

Structure -

Model structure

Every structure imposed onto the model grants stability and coherence. It designates what the model is not permitted to adapt and is opportunity for the imposition of irrevocable knowledge and incorrigible error.

architecture, modularity, form, shape, dimensionality, transformations, constraints, assumptions

Provides stability, interpretability, and integrates your knowledge.

Traps insight and locks out reality.

Enforce strictest narrative on target card and notice your discomfort.

"Which part of the model design could you not explain to a 5 year old?"

The architect forged a cage so precise that nothing inside could move without agreement. When he opened it to inspect his work, he found all the parts grinding against themselves or empty air.
