

Codomain Void

Codomain Boundary

Codomain Void

Void - Interior Void

Codomain Boundary

Outputs the model cannot, did not, or was never built to produce. Includes dimensionality, type, shape, structure, distribution of outputs: unproduced, unproducable, and out of scope outputs.

model output space shape, output modality/type/shape/structure/ distribution, constraints, output distribution

Missing modalities and unproduced output irrelevant to models purpose.

Absence of output mistaken as absence of phenomenon.

Are there outputs of target card that were omitted or unproduced?

"What kind of statements have I ruled out by design (of model, input)?"

There I saw it. Escape. A path out of here. But I have to squeeze through a slit so small, I wonder what will remain of me.
