

No Thought

Absence of reasoning

No Thought

Void - Exterior Void

Absence of reasoning

Where our conscious thought and reasoning did not properly propagate into the model. Consequently, logical errors, blind spots, irrationality, or meaningless blandness can be found there.

underspecification, formalization gap, blind spots, formal errors, conceptual oversight, misconceptions

Allocates attention and reasoning where it needs to be.

The important arguments have never been made.

Keep your understanding of target card low.

"Into which part of the model did I put the least thought?"

I talked to it for days until I noticed. It made me so angry I had to smash it. It did not even make a sound as it imploded.
