

No Will

Incomplete objective

No Will

Void - Exterior Void

Incomplete objective

Users will (decision/preference) not propagated into the model. There is no objective for the system to weigh different alternatives and so it cannot decide. Looks like objectivity but is lack of communication.

intent vs objective, absence of preference, uniformity, constraint non-propagation, user indecision

Refrains from enforcing unsubstantiated biases and behavior.

Modellers will not propagated to model.

Let go of trying to control target cards impact.

"What property do I hope for without enforcing it?"

Looked inside. Nothing there. The metal made a sad shearing sound as it sucked in the air, waiting to be filled.
