Through the mirror

Void - Void Dynamics

Perspective Inversion

Inverting perspective between presence-first and absence-first views reveals hidden asymmetries in model building and elsewhere. While no factual changes are made, the focus changes drastically.

foreground - background change, dual view, presence first vs absence first, perspective asymmetry

Reveals indecision, explicit exclusions, implicit commitments invisible in one view.

Introduces interpretive artifacts and unanalyzable regions of model space.

Describe target card in terms of what it is not.

"How much of your model is visible best in terms of what it does not do? "

We flip the view! Glorious giggling! We eat there, too! Same sky, new terror. The Blind spots! Warm and plentiful!
