Model space expansion

The space of possible models expands. A form that previously could not be chosen, excluded, or even considered enters as a possibility. T has expanded to $T + \Delta T$ with ΔT initially in U .

new model classes, new methods, new paradigms, new knowledge, new standards, search space, feasibility shift

Reveals model forms that were previously unavailable, unthinkable, or infeasible.

Search space expansion as main activity; commitment becomes harder.

For target card, introduce one new class of possibilities that was previously outside

"What kind of model was not even available to my thought until now?"

More sky! More hunger! The edge was a bridge instead! We run into the fresh dark laughing!
