

A hole in the clouds

Attention allocation

A hole in the clouds

Volition - Subliminal

Attention allocation

Where and how attention is permitted to fall. The involuntary narrowing of perception under limits of time, energy, and tolerance. By selecting what to examine, the modeler also selects what cannot matter.

tunnel vision, search space restriction, selective exposure, feature selection, data pruning, sampling bias

Enables focused inquiry.

Creates systematic blind spots; hides inconvenient anomalies.

For target card, change the level of detail with which you look at it.

"Which blind spots did I create by focusing my attention where I did?"

For years, a break in the cloud cover illuminated the coastline. There, maps and decisions were made quickly. When the clouds closed, the unmeasured land beyond the light had vanished from memory.
