Cognition

Volition - Cognition

Intellect

Cognition is the explicit intellectual layer of modelling that sets the objective, names what counts, applies logic and interpretation to represent world and model. Here thought becomes organized.

proxy metric, automation bias, objective function, narrative framing, model-reality mismatch

▲ Provides factuality, intelligence, interpretation, and structured judgment.

▼ Confuses mental objects, model, and reality.

▶ Ask which aspects of target card are purely mental.

"Which part of my reasoning is detached from reality or purpose?"

A map of the world. A map of the model. A map of yourself.
