Consequence arrives

Volition - Universal Will

Irreversible consequences

The end of revision. Once released, a model enters causal chains beyond recall. Technical, social, institutional effects propagate indifferent to intention. Some might be predictable but others are not.

unintended consequences, feedback, downstream effects, model as real-world object

- ▲ Foresight and restraint produce positive impact.
- ▼ You fight decision paralysis or future unintended consequences.
- ▶ Ask which effects of the target card cannot be undone.

"Which decisions will still matter later?"

Your model is part of the world now. It will remember when you forget.
