Narrative framing

A narrative framing that provides insight and illumination without clear source. Condenses complexity into story and story into meaning naturally. Mistakes perspective for truth and narrative for necessity.

framing effects, narrative bias, perspectivism, post-hoc rationalization, explanation shaping

Enables interpretation and communicable insight.

Framing narrative mistaken for fact, becomes invisible bias.

For target card, construct a different narrative than the one you hold currently.

"Is my explanation a discovery, or a construction?"

*→ Perspective → Explanation → Necessity
(Self removed for objectivity. Arrow remains.)*
