Subconscious

Subliminal is the pre-reflective base layer of modelling that shapes the modeller's later actions. Without explicit thought or decision, the modeler sees, avoids, endures, focuses, and prefers.

apophenia, defensive perception, ambiguity tolerance, attention allocation, aesthetic bias

- ▲ Generates intuition before explicit reasoning begins.
- ▼ Mistakes desire for evidence; reality filtered to comfort the modeller.
- ▶ Investigate your emotions towards target card.

"What did I feel before I started thinking?"

The weather system of the mind is the window through which we perceive and judge. Pressure is invisible, fog clouds our view, and the warmth attracts us.
