

Weathering the storm

Fatigue response

Weathering the storm

Volition - Subliminal

Fatigue response

How much uncertainty a modeler can endure. Determines when exploration becomes intolerable and closure is demanded. Searches end not when the goal is found but when searching becomes unbearable.

tension regulation, ambiguity tolerance, stress response, endurance limits, early stopping, forced decisions

- ▲ Enables decisiveness, pragmatic stopping, avoids sunken cost fallacy.
- ▼ Forces closure too early; abandons viable alternatives.
- ▶ Ask of the target card: At what emotional cost would I stop investigating this?

"How much uncertainty and criticism can I endure before I demand an answer?"

For weeks the storm neither worsened nor cleared. The crew learned to work beneath it, then learned to hate it. When land finally appeared, no one asked whether it was the right shore.
