

Weight of history

Inherited paradigms

Weight of history

Volition - Universal Will

Inherited paradigms

Prebuilt structure before your own thoughts were set to the task. You inherit not only data, but methods, defaults, metaphors, and blind spots. These precede choice and shape it. You never truly begin from zero.

inherited paradigms/frameworks/assumptions/methods/constraints/toolboxes, path dependence, prior structure

Provides stable, accumulated wisdom.

Calcified, outdated thinking.

Trace target cards concept back to when you first learned of it.

"Which part of my model existed before I did?"

Nothing begins unconstrained.
